

APPLICATIONS:

- Office
- Retail
- Banks
- Schools
- Government
- Institutional
- Light Duty storage areas

ADVANTAGES:

- No Nuts & Bolts or clips required
- Beam brackets attach to frame

APPEARANCE:

- Clean looking, common square front post with no holes
- Designed for office or retail environment
- Shelving: particle board and steel available
- Standard colour beige

PRODUCT SPECIFICATIONS:

Components:

1. Upright 1" x 1/8" tubular posts manufactured from 14 gauge cold rolled steel with slots on 1" centres and a half slot at the top of the post for a flush mounted top shelf. Posts shall be usable as common posts.
2. 'Z' shaped frame connectors: manufactured from 14 gauge cold rolled steel with three (3) hooks and locking tab.
3. Front and back beams: 1" high semi-V shaped with two (2) hooks at each end. Beams cover the front and back edge of particle board, providing a clean look.
4. Base plates or heavy duty front and back beams are manufactured from 14 gauge HRP&O steel.
5. Shelves: 5/8" thick industrial grade 42 lbs. test particle board and be designed to take the loading specified in the construction notes. Additional capacities per level achieved by use of shelf supports and tie bars. Steel shelves also available.
6. Endframes: consisting of two (2) posts and two (2) frame connectors for 74" and 86" heights and three (3) frame connectors for 96" height achieves a load capacity of 6000 lbs. per endframe.
7. Accessories: Foot plates, post caps and top and bottom beam safety clips provided on each section if required.
8. Strength: Shelves supported by Standard Beams have higher load capacity than standard steel shelving. Heavy Duty Baseplate Beams provide even higher capacity.
